🎓 EDUCATION

Information Technology,

New Assiut Technological University [🔗](#)

2023 – present | New Assiut, Assiut

🧠 SKILLS

- HTML5 & CSS3
- JavaScript (ES6+)
- Bootstrap & Tailwind
- RBAC & Auth Systems
- React.js
- PHP & Laravel
- RESTful APIs & Postman
- MySQL & DB Design
- Git & GitHub

📁 PROJECTS

University Management System

Developed a comprehensive university platform featuring interactive pages for faculties/departments and dedicated profiles for **teaching staff (Teaching Assistants & Professors)**.

Built a centralized student affairs system enabling admins to:

Add/Manage student records, academic grades, and attendance history.

Designed a **QR Code-based attendance system** reducing manual check-in time.

Created role-based dashboards:

Students: **Track grades, attendance status, and academic progress in real-time.**

Admins: **Manage courses, users, and generate system analytics.**

Super Admins: **Add/Remove admins.**

Enhanced UI/UX with Tailwind CSS v4 and GSAP animations for seamless interactions.

Technologies: Laravel, MySQL, JavaScript, Tailwind CSS, GSAP.

TravelBookingUI

A **simple, responsive frontend UI** for a travel booking website. This project showcases **various tourist destinations** across multiple pages, with each page featuring three distinct locations. Built purely with **HTML, CSS, and JavaScript**, leveraging the **Bootstrap framework** for a **clean, modern, and responsive design**. It focuses on delivering an **intuitive and visually appealing user experience** for Browse travel options.

Full-Stack E-commerce Platform [🔗](#)

Full-Stack E-commerce Platform developed with **C#/.NET (back-end)** and **HTML/CSS/JS/Bootstrap (front-end)**. Features include **multi-category product display**, **user authentication**, and **full shopping cart functionality (add, edit, delete)**. Focuses on **intuitive UX** and **robust data management**.
