SUMMARY

Full-Stack Web Developer with strong hands-on experience building web applications using Laravel, PHP, MySQL, and React. Experienced in developing RESTful APIs, authentication and RBAC systems, relational database architecture, and business logic. Strong foundation in OOP, SOLID principles, Clean Code, and software engineering practices, with additional experience developing backend applications using C# and .NET.

EDUCATION

Bachelor of Technology in Industry and Energy - Information Technology

New Assiut Technological University

Cumulative Grade: Excellent

2023 – Present

Assiut, Egypt

WORK & PROJECT EXPERIENCE

University Management System 🔗

02/2025 – 03/2025

Backend Developer | Laravel, PHP, MySQL | Team Project

- **Backend & RBAC:** Collaborated within a development team to engineer core backend logic using PHP and Laravel, featuring granular Role-Based Access Control (RBAC) for admins, staff, and students.
- **Database Architecture:** Designed a relational MySQL database mapping complex multi-entity relationships across colleges, departments, academic years, assignment deadlines, and gradebooks.
- **Dynamic QR Attendance:** Engineered a real-time QR Code attendance module with dynamic 3-second token regeneration to eliminate proxy attendance and unauthorized code sharing.

E-Commerce Platform 🔗

02/2026 – Present

Full-Stack Laravel Developer | Internship Task at PureSoft

- **Backend Core:** Developed a full-stack e-commerce solution using PHP, Laravel, and MySQL as an internship task, implementing authentication, product CRUD, and seller management.
- **Checkout & DB:** Designed relational MySQL database schemas using Eloquent ORM and engineered shopping cart sessions, multi-option checkout, and shipping workflow logic.

Enterprise Web Module 🔗

06/2025 – 06/2025

Backend Developer | C#, .NET | Academic Project

- Developed scalable backend components using C# and .NET as part of university coursework, applying core OOP principles and MVC architecture.

SKILLS

Backend Development:

- PHP, Laravel, C#, .NET, RESTful APIs, Authentication, RBAC

Database:

- MySQL, Relational Database Design, Eloquent ORM, Query Optimization

Professional & Soft Skills:

- Technical Problem Solving & Debugging, Pair Programming, Team Collaboration, Technical Communication, Continuous Learning

Frontend:

- React, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Software Engineering:

- OOP, SOLID, Design Patterns, Clean Code, Data Structures & Algorithms, Agile Methodologies, Unit Testing

Tools:

- Git, GitHub, Docker, VS Code, XAMPP, Postman, CI/CD Fundamentals
